

VariPrep

The Matrix Applicator

by ValUse

Tedious sample preparation?

With home built setups, **MALDI-MSI** sample preparation is complex. Therefore, lab workers need time to deepen their experience and work up their setup for robust sample quality. Valuable time, which is scarce at many points on a scientific journey. VariPrep is on its way to help, so you can focus on the results.

Your easy solution!

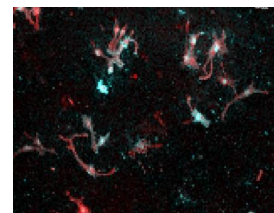

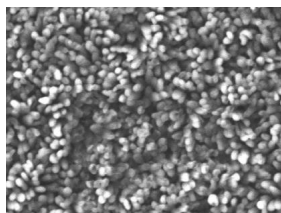

VariPrep gets your precious samples ready for measurement via sublimation

- **Fast** within 2 minutes from start to finish
- **Reproducible** with easiest set-up and use for all levels of experience
- **Efficient** due to perfect integration in new or established MALDI-MSI laboratories
- **Comfortable** with lightweight and robust materials for easy and safe operation
- **Self-enclosing** so it doesn't need a hood

Feature highlights

Yield the sharpest images

And even more!

Employ your present sprayer to stock matrix sources! Get more out of each weighting step with **VariPrep!**

Increase signal intensity with **recrystallization**. **VariPrep** is your single-set-up **defined environment**.

Samples can be prepared anywhere, by anyone. Sample creators use **VariPrep** ad-hoc for freshest **results!**
